EXPERIENCE

Itau Bank / Tech Lead Jr.

October 2018 - December 2022 - Santiago, Chile

Developing and maintaining ASP.NET, SSIS, and SQL Server-based data-centric web applications at Itau Bank, following Agile/SCRUM methodology.

Key Responsibilities and Achievements:

- Developed business logic in C#.NET, ETL solutions, and business rules to integrate diverse data sources into a centralized repository.
- Utilized SQL Server Integration Services (SSIS) to migrate AS400 Cobol systems to SQL Server, improving their management and performance.

Key Projects and Achievements:

- Enhanced Cash Management applications including Online Payroll (NEL), Payroll Payments, and Supplier Payments.
 - Implemented features to optimize transaction processing and user experience, ensuring compliance with security and data privacy standards.
 - Led API.NET Framework 4.8 integration efforts, enhancing operational efficiency and expanding client base.
- Designed and implemented a payment certificate system using SQL Server and an API, improving financial service accessibility and efficiency.

Kibernum S.A. / Software Engineer .NET

September 2017 - October 2018 - Santiago, Chile

Developing requirements for stakeholders within an Agile team, serving ITAU Bank. Utilized the following technologies and software:

- .NET, Web Services, PL-SQL, ETL, AngularJS.
- Visual Studio 2019, SQL Server 2014.

MicroSystem S.A. / Software Engineer

June 2015 - September 2017 - Santiago, Chile

Based on the Pectra BPMS system where we added business flows to satisfy the different areas of the client using the following technologies and software:

- .NET/ Crystal Report / Web Services /Classic Asp. / Pectra BPMS
- Visual Studio 2012 / SQL Server 2008 R2.
